

## 15 VANJSKA TRGOVINA

### 15-0 METODOLOŠKA OBJAŠNJENJA

#### Izvori i metode prikupljanja podataka

Prema konceptima, definicijama i preporukama UN<sup>1)</sup> kao izvor podataka za statistiku vanjske trgovine mogu se koristiti carinske deklaracije, anketiranje preduzeća/poduzeća, administrativni registri, registri Porezne uprave, registri deviznog tržišta i sl..

Osnovni izvor podataka za statistiku vanjske trgovine Federacije BiH je Jedinствена carinska isprava (JCI) koju deklarant (poslovni subjekt ili druga ovlaštena osoba, npr. špediter) podnosi carinarnici prilikom carinjenja robe. Za prikupljanje i kontrolu ispravnosti carinskih deklaracija odgovorna je Uprava za indirektno/neizravno oporezivanje BiH, koja propisuje oblik, sadržaj, način ispunjavanja i podnošenja isprava u carinskom postupku.

Federalni zavod za statistiku preuzima od Agencije za statistiku BiH, originalnu carinsku bazu podataka Uprave za indirektno/neizravno oporezivanje BiH u obliku slogova na magnetnom mediju i dalje ih statistički obrađuje i publicira.

#### Obuhvat podataka

U praćenju tokova međunarodne trgovine robama postoje dva pristupa, koji su blisko povezani sa konceptima ekonomske i statističke teritorije i korišćenja carinskih procedura. Kako se prikupljanje podataka temelji na carinskim procedurama, u mnogim zemljama usvojen je princip da se statistička granica podudara sa carinskom granicom, odnosno da statistička teritorija koincidira sa carinskom teritorijom.

Postoje dva trgovinska sistema i to: Sistem opće trgovine (General Trade System) i Sistem specijalne trgovine (Special Trade System). Glavna razlika između ova dva koncepta leži u tretiranju roba koje prolaze kroz carinska skladišta i komercijalne slobodne zone.

U statistici vanjske trgovine Federacije BiH koristi se proširena definicija Specijalnog sistema/sustava trgovine što je u punom skladu sa preporukama Eurostata.<sup>2)</sup> Prema ovom sistemu u statistiku vanjske trgovine uključuju se: redovan izvoz i uvoz, unutarnja i vanjska obrada, te robe koje ulaze ili napuštaju slobodne industrijske zone.

## FOREIGN TRADE

### NOTES ON METHODOLOGY

#### Sources and methods of data collection

*According to the concepts, definitions and recommendations of UN<sup>1)</sup>, the following can be used as data sources in foreign trade statistics: customs declarations, administrative registers, Tax Authority registers, registers of monetary market and surveys on enterprises.*

*The main source of data for the statistics on exports and imports is Single Administrative Document (SAD). The B&H Indirect Taxation Agency is responsible for collection and control of the validity of SAD, and it also determines the form, the content, the way of filling in, and the way of submitting of SAD.*

*Federal Office of Statistics receives from the B&H Agency for statistics original customs database, originated and reviewed from the Indirect Taxation Agency and performs further data processing and dissemination.*

#### Coverage

*There are two concepts in observing international trade flows, closely connected to the matters of economical and statistical territory and customs procedures. Having in mind that the collection of data is based on customs procedures, in the most of the countries statistical territory coincide with the customs territory.*

*Two trade systems are in use in the international trade statistics: General Trade System and Special Trade System. The main difference is in covering stocks in customs warehouses and commercial free zones.*

*Following the recommendations of the Eurostat<sup>2)</sup> the Special Trade System is used in Federation of Bosnia and Herzegovina. According to that, regular exports and imports, inward processing, outward processing and the goods flow in free industrial zones are included in the Foreign Trade Statistics.*

## VANJSKA TRGOVINA FOREIGN TRADE

Prema sistemu/sustavu specijalne trgovine robe koje iz inozemstva ulaze u carinska skladišta, slobodne komercijalne zone ili na druge prostore pod carinskom kontrolom i nadzorom neće biti registrirane kao uvoz niti će biti registrirane kao izvoz ukoliko odatle budu ponovo izvezene. Robe iz carinskih skladišta, slobodnih komercijalnih zona i ostalih prostora pod carinskom kontrolom, prema sistemu/sustavu specijalne trgovine, bit će registrirane kao redovan/redovit uvoz tek onda kada uđu na slobodno unutarnje tržište.

U statistiku vanjske trgovine ne uključuju se robe u tranzitu niti privremeni izvoz i uvoz bez promjene vrijednosti.

Prema tome, u podatke o izvozu i uvozu robe uključeni su:

- redovan/redovit izvoz
- izvoz na vanjsku obradu
- izvoz nakon unutarnje obrade (po sistemu odgođenog plaćanja i sistemu povrata dažbina)
- redovan/redovit uvoz
- uvoz nakon vanjske obrade
- uvoz na unutarnju obradu (po sistemu odgođenog plaćanja i sistemu povrata dažbina)

### Nomenklature i klasifikacije

#### • Harmonizirani sistem - HS

Prikupljanje statističkih podataka o vanjskotrgovinskom prometu zasniva se na međunarodnoj nomenklaturi robe: Harmonizirani sistem-HS, koju je razradila Svjetska carinska organizacija WCO.<sup>3)</sup> Tarifna oznaka HS ima šest cifara. Prva i druga cifra su redni broj glave, treća i četvrta su redni broj tarifnog broja unutar glave, a peta i šesta su konkretnija oznaka vrste robe. Svaki pet godina radi se revizija HS.

#### • Kombinirana nomenklatura CN

Države Evropske/Europske unije proširile su HS 6 uvođenjem sedme i osme cifre tako da je CN kodirana osmocifarskim arapskim brojevima i primjenjuje se od 1991. godine. Za razliku od HS CN se mijenja svake kalendarske godine.

#### • Carinska tarifa BiH

Zakonom o carinskoj tarifi BiH, član/članak 2 (Službeni glasnik BiH, broj 1/98) BiH je prihvatila nomenklaturu HS 6. Odlukom o primjeni člana/članka 2 Zakona o carinskoj tarifi BiH (Službeni glasnik BiH, broj 6/98) tarifna oznaka carinske tarife BiH ima deset cifara.

*On the other side, the goods imported in, or exported from, the customs warehouses, the free commercial zones and the other premises under custom supervision are not included in the Foreign Trade Statistics. These goods will be included in imports only in case if they are sold in the domestic free market.*

*Foreign trade statistics does not include goods in transit and exports & imports of goods temporarily admitted or dispatched without any alterations in value.*

*According to Special Trade System, exports & imports data include:*

- Regular exports;
- Exports for outward processing;
- Exports after inward processing (according to suspension system and drawback system);
- Regular imports;
- Imports after outward processing;
- Imports for inward processing (according to suspension system and drawback system).

### Nomenclatures and classifications

#### • Harmonized System - HS

*Foreign trade data have been collected according to Harmonized Commodity Description and Coding System-HS developed by World Custom Organization WCO<sup>3)</sup>. HS code has six digits. First two are mark for Chapter number, the third and the fourth digit are mark for the numerical order in which the heading appears within that Chapter, and the last two digits refer to more detailed description of the goods.*

#### • Combined Nomenclatures - CN

*Since 1991 the EU countries have developed Combined Nomenclature – CN on the base of HS by adding the seventh and the eighth digit referring to the specific needs of EU. CN is revised every year.*

#### • B&H Customs tariff

*By The Law of Customs tariff, Article 2 (Official Gazette of B&H, No. 1/98) B&H accepted HS. By The Governmental Decision of application of The Law of Customs tariff, Article 2 (Official Gazette of Bosnia and Herzegovina, No. 6/98) customs tariff of B&H has ten digits.*

Istom je odlukom prihvaćena i usklađenost sedme i osme cifre sa nomenklaturom EU, dok deveta i deseta cifra služe za potrebe daljnijega raščlanjivanja u okviru specifičnih potreba BiH. HS, odnosno CN integrirane su u strukturi carinske baze podataka i vezane su za Standardnu međunarodnu trgovinsku klasifikaciju – SMTK Rev. 3<sup>4)</sup> i Klasifikaciju djelatnosti BiH, koja je usklađena sa evropskom klasifikacijom ekonomskih aktivnosti-NACE Rev. 1.1.<sup>5)</sup>

*The first six digits are in line with HS and the seventh and the eighth digit are in line with the CN. The ninth and tenth digits are developed to meet the specific needs of B&H. The Customs tariff based on HS and adjusted to CN is basic nomenclature integrated into structure of foreign statistics database and linked to Standard International Trade Classification – SITC, Rev. 3, and to Classification of Activity B&H, which is in line with Statistical Classification of Economic Activities in EU – NACE, Rev. 1.1.*

U skladu/sukladno sa međunarodnim standardima kao nomenklatura država koristi se Geonomenklatura EU ISO (alfa kod) 3166.

*Geonomenclature EU ISO (alpha code) 3166 has been used in Foreign Trade Statistics of Federation of B&H in accordance to internationally accepted standards for nomenclatures of the states.*

Podaci o izvozu iskazani su prema zemlji namjene/odredišta robe, a u uvozu prema zemlji porijekla/podrijetla robe. To znači da se kod izvoza registrira zemlja posljednjeg odredišta (destinacije) u kojoj se roba troši ili dalje potpuno prerađuje, a kod uvoza ona zemlja u kojoj je roba proizvodnjom ili doradom dovedena u stanje u kom se uvozi.

*Exports & imports data are also reported according to the country of destination in case of exports, and the country of origin in case of imports. Thus, the country registered in case of exports is the country of last known destination, the one in which goods are consumed or further processed, and in case of imports, it is the one where goods, through production or processing, achieved the condition they are in at the time of imports.*

Obrada podataka o vanjskotrgovinskoj razmjeni Federacije BiH radi se prema Klasifikaciji djelatnosti, SMTK i ISO 3166.

*Exports&imports data of Federation of Bosnia and Herzegovina is disseminated by Classification of Activity, SITC and ISO 3166.*

### Konverzija valute

Podaci o izvozu i uvozu izraženi su vrijednosno u konvertibilnim markama i u EUR-ima. Vrijednosti izražene u drugim valutama preračunavaju se u konvertibilne marke i EUR e primjenom tekućih dnevnih kurseva/tečajeva koji vrijede na dan carinjenja, a utvrđuje ih Centralna banka BIH. Sve su vrijednosti obračunate na osnovi pariteta franko BiH granica: FOB cijene za izvoz i CIF cijene za uvoz.

### Valuation

*The value of exports and imports are expressed in convertible marks and EUR. The value expressed in other currency is converted into convertible marks and EUR by current daily exchange rate list valid on the day of custom clearance. Exchange rate list is established by Central bank of Bosnia and Herzegovina. All values are calculated according to free B&H border parity, i.e. exports based on FOB parity, and imports based on CIF parity.*
