KLANJE STOKE I PERADI U KLAONICAMA, MART/OŽUJAK 2015.

LIVESTOCK AND POULTRY SLAUGHTERED IN ABATTOIRS, MARCH 2015

U martu 2015.godine, u odnosu na mart prethodne godine, u ukupnim kategorijama stoke bilježi se povećanje kod klanja goveda u broju za 9,5% i neto težini za 57,8% te kod klanja peradi u broju za 6,6% i neto težini za 0,3%.

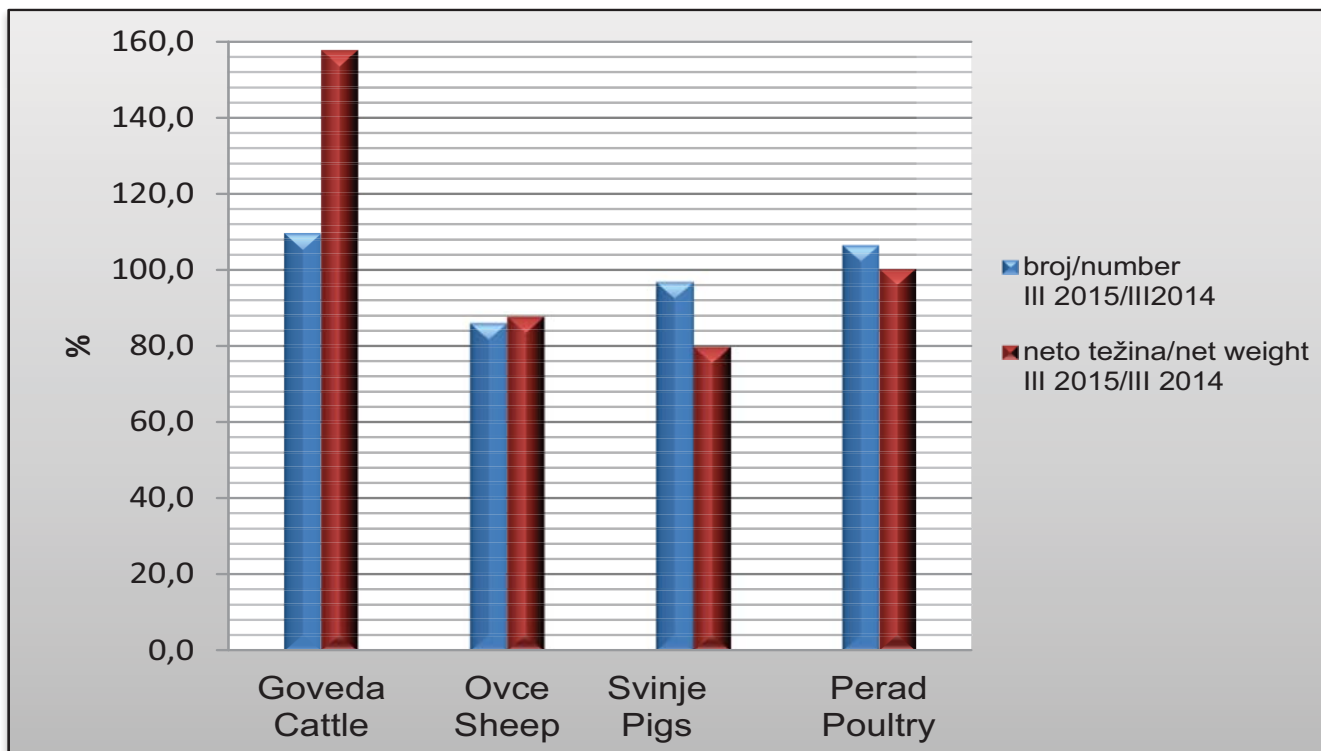

Kod klanja ovaca i svinja u martu 2015, u poređenju sa martom 2014. godine, bilježi se smanjenje, i to kod ovaca u broju za 13,9% i neto težini za 12,1%, te kod svinja smanjenje u broju za 3,3% i neto težini za 20,2%.

Concerning the total livestock categories, in March 2015 as compared to March of the previous year, there was the increase of 9.5% in the number and of 57.8% in the net weight of the slaughtered cattle as well as of 6.6% in the number and of 0.3% in the net weight of the slaughtered poultry.

Concerning the slaughtered sheep and pigs, in March 2015 as compared to March 2014, there was the decrease of 13.9% in the number and of 12.1% in the net weight of the slaughtered sheep as well as of 3.3% in the number and of 20.2% in the net weight of the slaughtered pigs.

Metodološka objašnjenja

Podaci o broju grla zaklane stoke i peradi po vrstama i kategorijama, bruto težini (težini žive stoke i peradi), neto težini (težini zaklane stoke i peradi) i podaci o randmanima prikupljaju se mjesečnim izvještajem o klanju stoke i peradi u klaonicama za pravna lica (PO-52) i za obrtnike (PO-52a)

Izvještajne jedinice za istraživanje PO-52 su pravne osobe i dijelovi pravnih osoba razvrstani prema KD BiH 2010 u djelatnost prerada i konzerviranja mesa (Područje C-Prerađivačka industrija, Oblast 10, Grana 10.1, Razred 10.11-Prerada i konzerviranje mesa i 10.12-Prerada i konzerviranje mesa peradi).

Izvještajne jedinice za istraživanje PO-52a su veterinarske stanice i kantonalne uprave za inspekcijske poslove za obrtnike registrovane prema KD BiH 2010 za obavljanje djelatnosti prerade i konzerviranja mesa (Područje C-Prerađivačka industrija, Oblast 10, Grana 10.1, Razred 10.11-Prerada i konzerviranje mesa i 10.12-Prerada i konzerviranje mesa peradi).

Bruto težina predstavlja težinu stoke i peradi prije klanja izraženu u tonama.

Neto težina je težina očišćenog trupa zaklane stoke i peradi bez kože, krvi, glave (osim kod odojaka i peradi), utrobe, prednjih nogu do koljena i stražnjih nogu do skočnog zgloba, izraženo u tonama.

Randman zaklane stoke i peradi predstavlja odnos težine zaklane stoke i peradi (neto težine) i težine žive stoke i peradi (bruto težine), a iskazuje se u postocima sa jednom decimalom.

Pokazatelji ovog istraživanja koriste se za izračunavanje proizvodnje mesa u registrovanim klaonicama i za izračunavanje ekonomskih računa u poljoprivredi.

Notes on methodology

Data on the number of slaughtered livestock and poultry by types and categories, gross and net weight of livestock and poultry, as well as the coefficient of utilization are collected by monthly report on slaughtering of livestock and poultry in slaughterhouses for legal entities (PO-52) and for entrepreneurs (PO-52a) collects.

Reporting units for survey PO-52 are legal entities and parts of legal entities classified, by Classification of economic of B&H 2010, activity processing and preserving of meat (Area C Manufacturing, Section 10, Group 10.1, Class 10.11-Processing and preserving of meat and Class 10.12-Processing and preserving of poultry meat).

Reporting units for survey PO-52a are veterinary services and cantonal veterinary inspections for entrepreneurs registered, by Classification of economic of B&H 2010, for activity of processing and preserving of meat (Area C Manufacturing, Section 10, Group 10.1, Class 10.11-Processing and preserving of meat and Class 10.12 - Processing and preserving of poultry meat).

Gross weight is the weight of livestock and poultry in tons and before slaughter.

Net weight is the weight of dressed carcass of slaughtered livestock and poultry without skin, blood, head (except piglets and poultry), womb, front legs to the knee and the back legs to the hock, in tons.

Coefficient of utilization is ratio of weight of slaughtered cattle and poultry (net weight) and the weight of livestock and poultry (gross weight), and is expressed as a percentage with one decimal.

These indicators are used to review the calculation of domestic production in registered slaughterhouses, and calculation of economic accounts in agriculture.
