METODOLOŠKA OBJAŠNJENJA

Izveštajne jedinice

Podaci o proizvodnji južnog voća i maslina prikupljaju se redovnim statističkim istraživanjem "Izveštaj o ostvarenim prinosima južnog voća i maslina" (PO-34).

Rodna stabla voća i rodni čokoti/trsovi vinove loze su stabla, odnosno čokoti/trsovi koja su prema svojoj fiziološkoj zrelosti sposobna da pod normalnim uslovima/uvjetima za vegetaciju zametnu plod, bez obzira da li su u toj godini rodila ili ne.

Prinos/prirod po stablu i čokotu/trsu (kg) obračunati su po rodnom stablu, odnosno čokotu/trsu vinove loze.

METHODOLOGICAL NOTES

Report units

The data on production of citrus, fig and olive are collected through regular statistical survey "Survey on production of citrus, fig and olive" (PO-34).

Fruit trees and vines / grapevines are trees or grapevines that, by their physiological maturity, are capable of producing fruit under normal conditions / vegetation conditions, whether or not they have given birth in that year.

Yield per tree and grape-vine (kg) is computed for bearing trees, respectively grape-vines.
